WE enable carbon capture deployment

Who

The world's largest post-combustion CO₂ capture test centre

Why

To create and accelerate a competitive carbon capture market

How

By offering facilities and capabilities for taking the last step before commercialization

What

- Technology testing to support technology developers
- Sharing knowledge with the public domain
- Advisory services to support technology buyers

Site for EMERGING TECHNOLOGIES at TCM

Industrial environment

Two industrial flue gas sources with different levels of CO₂ (1 – 20 %). 24/7 operations.

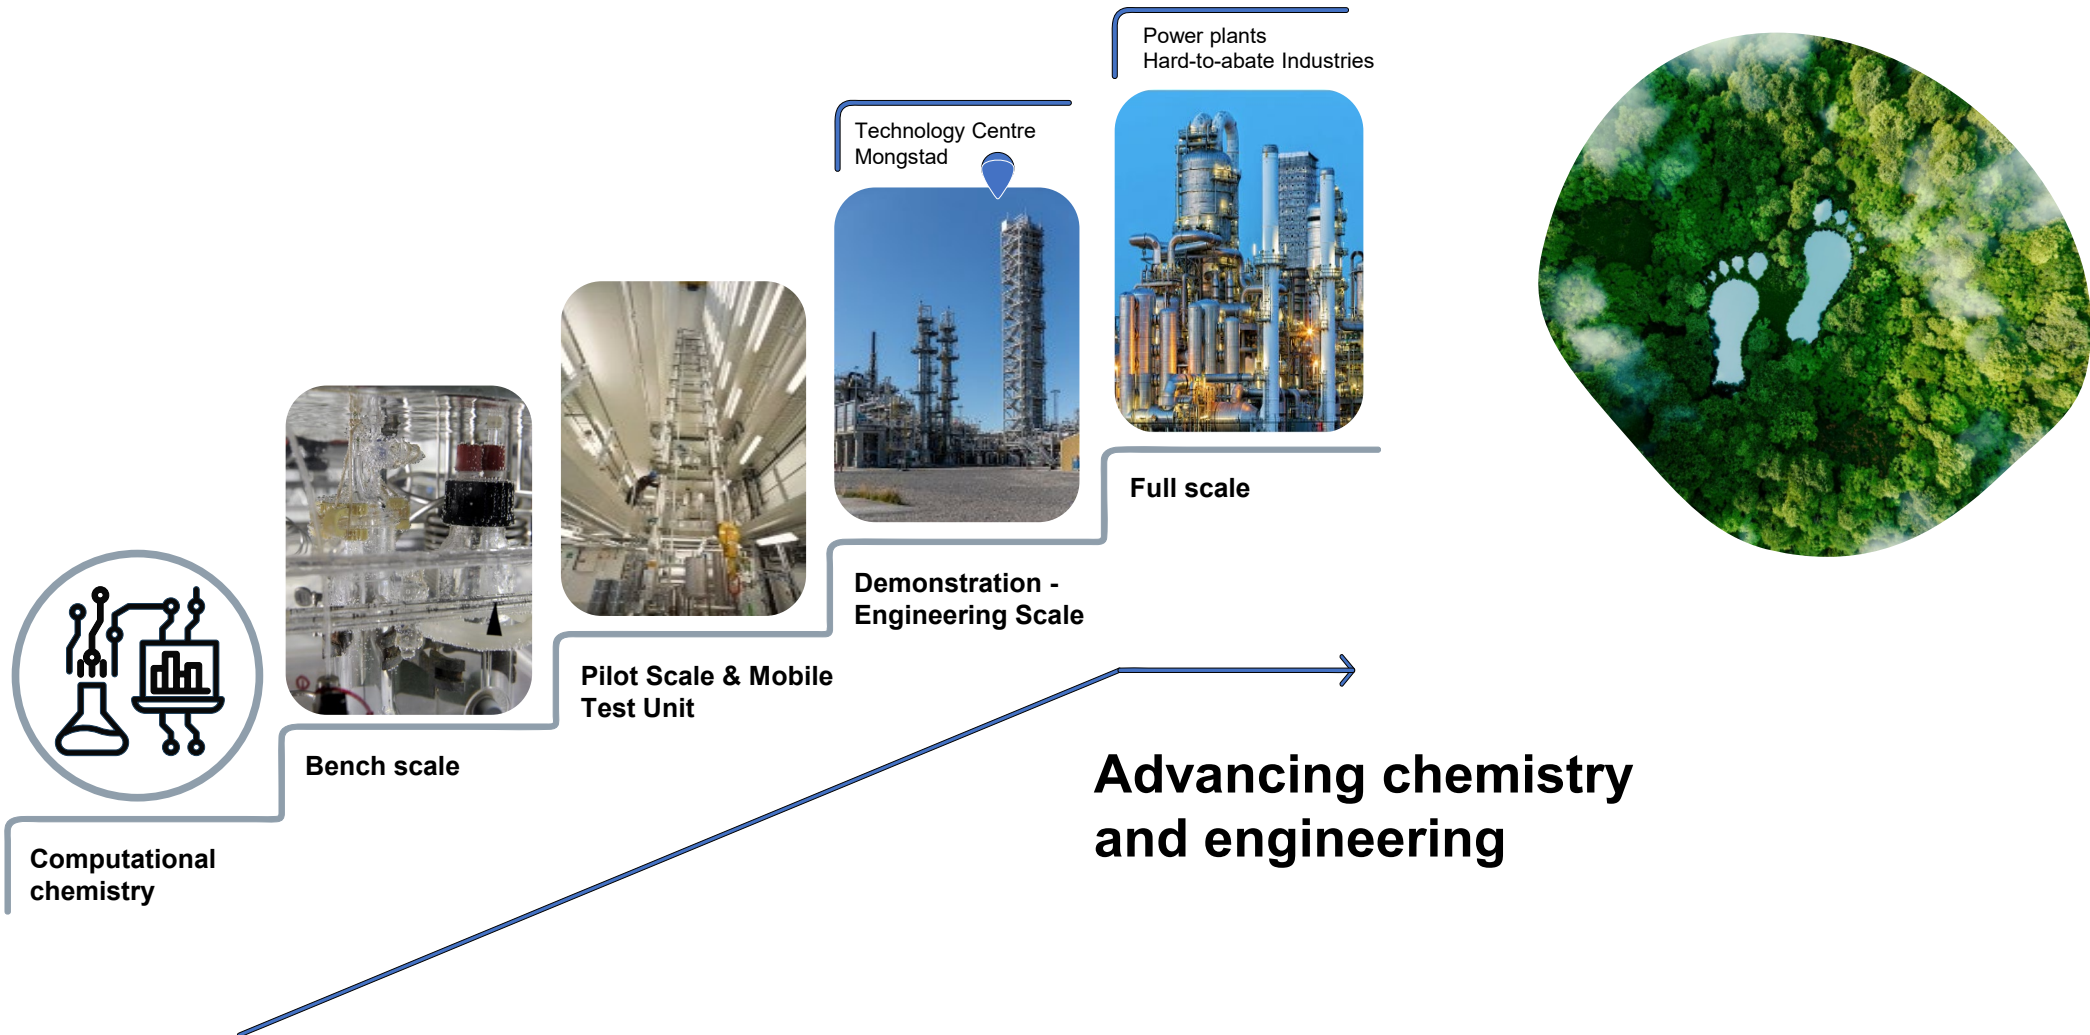

Capacity

18,000 tons CO₂ per year.
Possibility to test multiple technologies in parallel.

Analytical & laboratory capabilities

Sophisticated analytical methods
State of the art laboratory

TECHNOLOGY READINESS LEVEL

Technology Developers TESTED AT TCM

>

TCM crucial in commercialization of CC technologies

Most major projects in Europe selected technologies tested at TCM

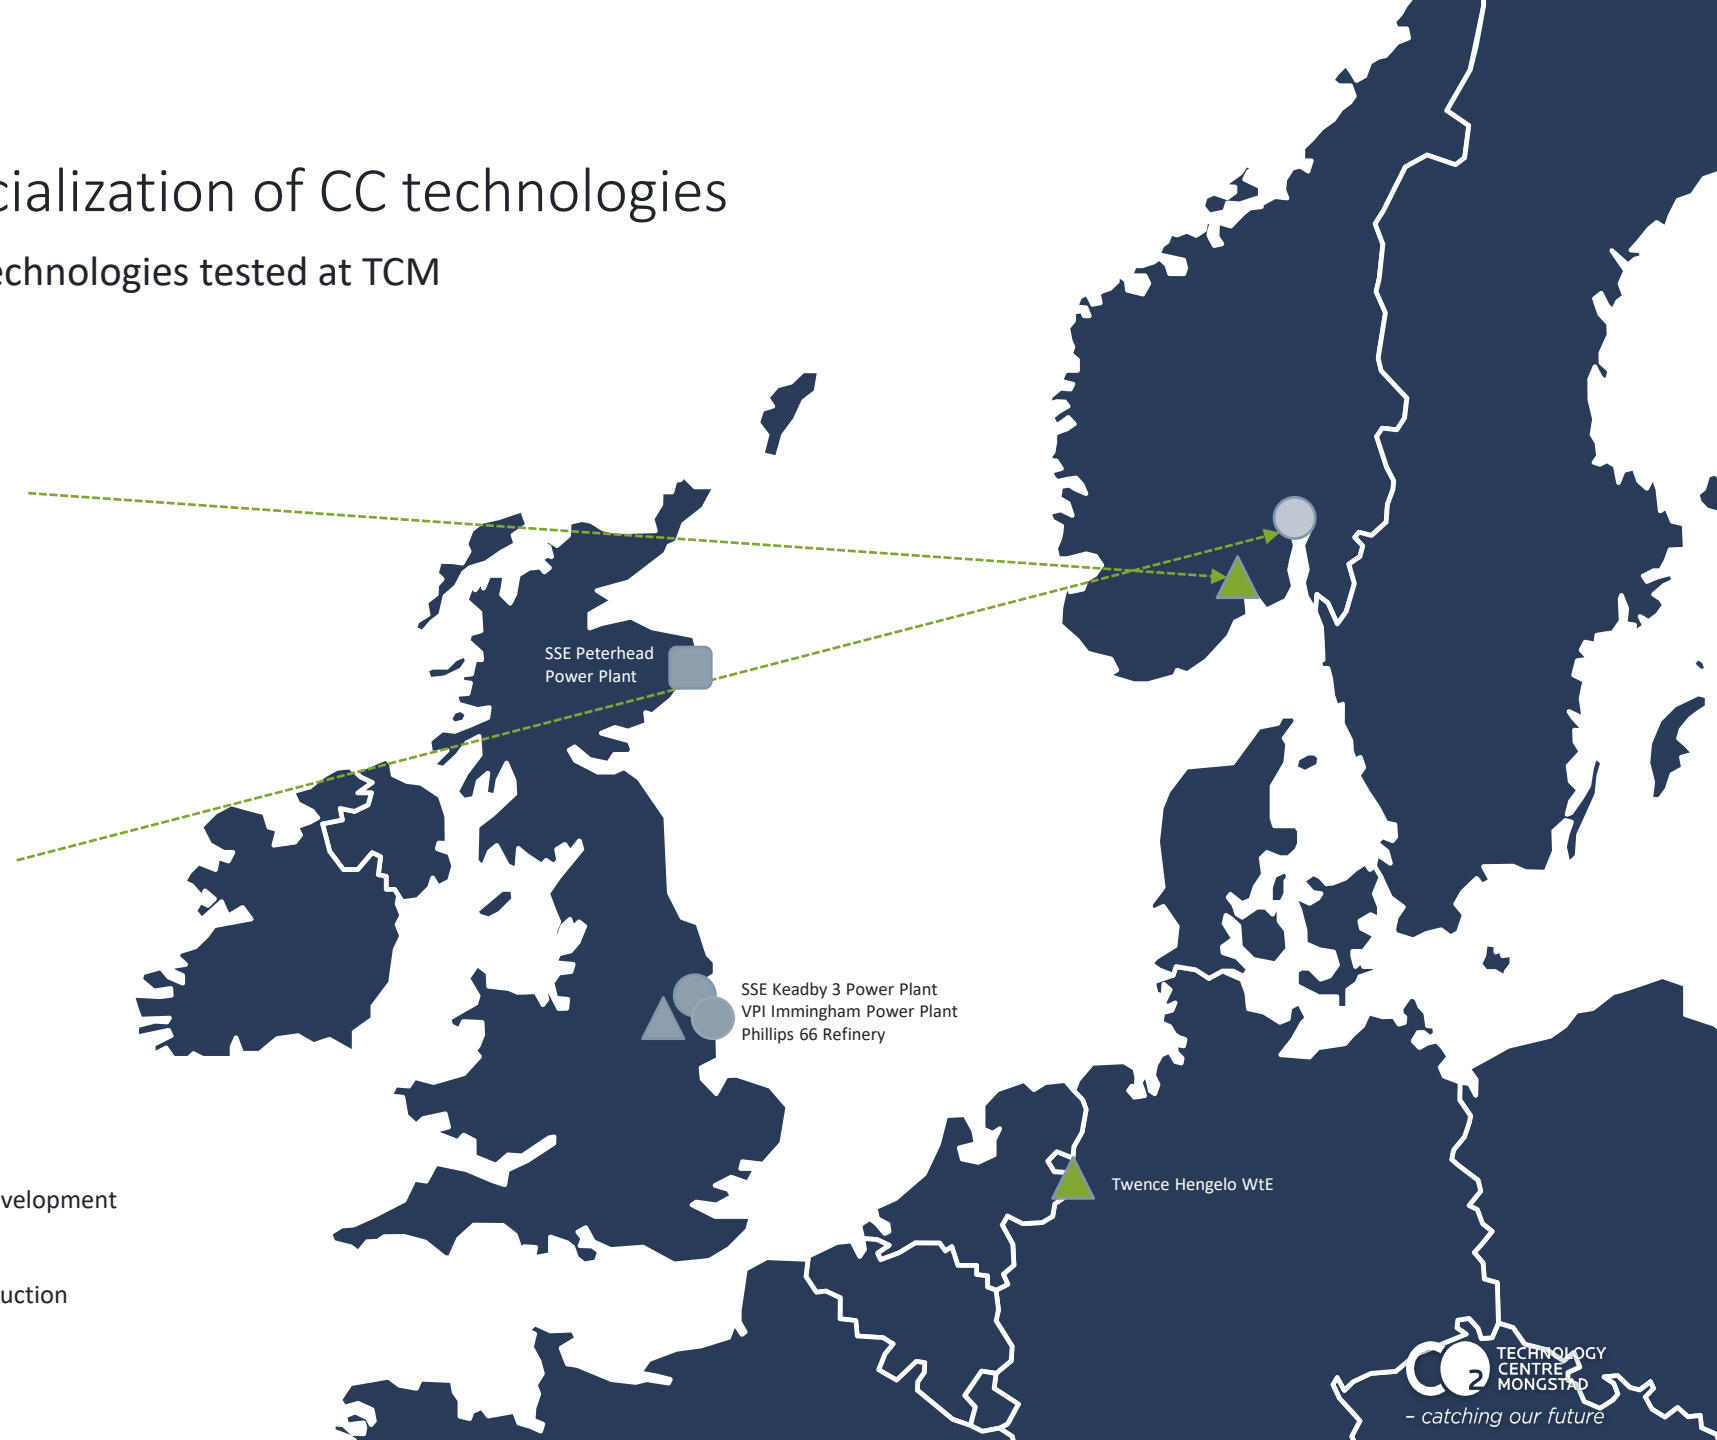

Cement plant
400 kTPA of CO₂ capture
Start-up date 2025

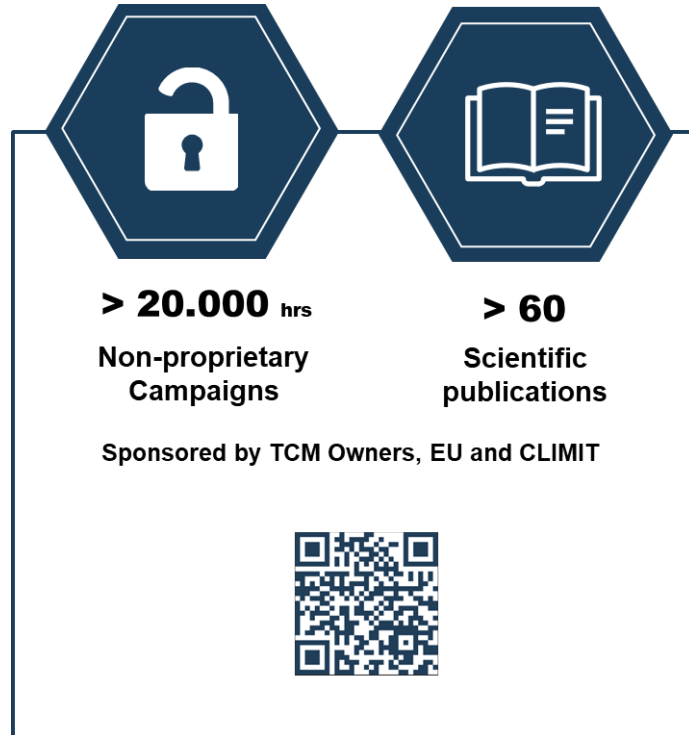

Waste to Energy
400 kTPA of CO₂ capture

- Aker Carbon Capture
- Shell CANSOLV
- MHI ENG

- Advanced development
- Under construction

KNOWLEDGE generation & sharing

The infographic features two hexagonal icons at the top: an open padlock on the left and an open book on the right. Below the padlock icon, the text reads '> 20.000 hrs Non-proprietary Campaigns'. Below the book icon, the text reads '> 60 Scientific publications'. At the bottom of the infographic, it states 'Sponsored by TCM Owners, EU and CLIMIT' and includes a QR code.

> 20.000 hrs
Non-proprietary
Campaigns

> 60
Scientific
publications

Sponsored by TCM Owners, EU and CLIMIT

- TCM has established 4 different 3rd party verified baselines with non-proprietary solvents (MEA, CESAR1)
- Large operating windows are explored
- Different mode of operations explored: dynamic, cold and hot startups, shutdowns etc.
- HSE aspects successfully demonstrated

TCM SUPPORT PROJECTS

with its advisory services

Supporting Norwegian and EU decarbonization paths towards 2050

Advanced development of storage in North Sea driving TCM Advisory Services strategy
