

Your global hub for fuels

Creating a low carbon energy port

**Port of
Amsterdam**

The scale of our challenge *or opportunity*

6.100.000 m³
of liquid storage capacity

Export to **+70** countries
worldwide

45 million tons
of transport fuels throughput / year*

Welcome to the port of Amsterdam

European seaport in numbers

Inland shipping calls
(no. ships in NZKG, 2021)

67,842

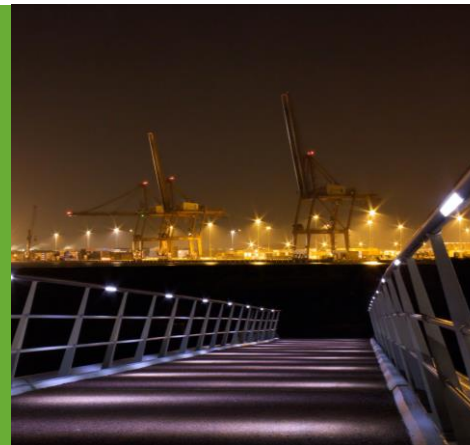

Port related employment
(no. of jobs, 2023)

73.009

Ambition non-fossile
revenues

65%

(2025)

Gross site issue
(in hectares, 2022)

46.7

Sea shipping calls
(no. ships in NZKG, 2021)

7591

Position sea port in
Western Europe 2021

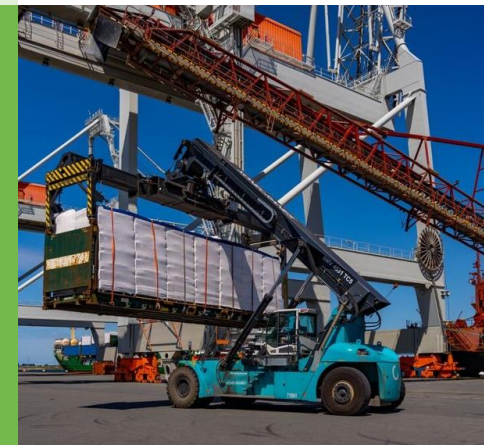

4th

Companies in port area
(no. In Amsterdam
Westpoort)

1612

Transshipment in
Amsterdam
(in mln. tonnes, 2022)

78.6

A global hub for **renewable** fuels

Our role

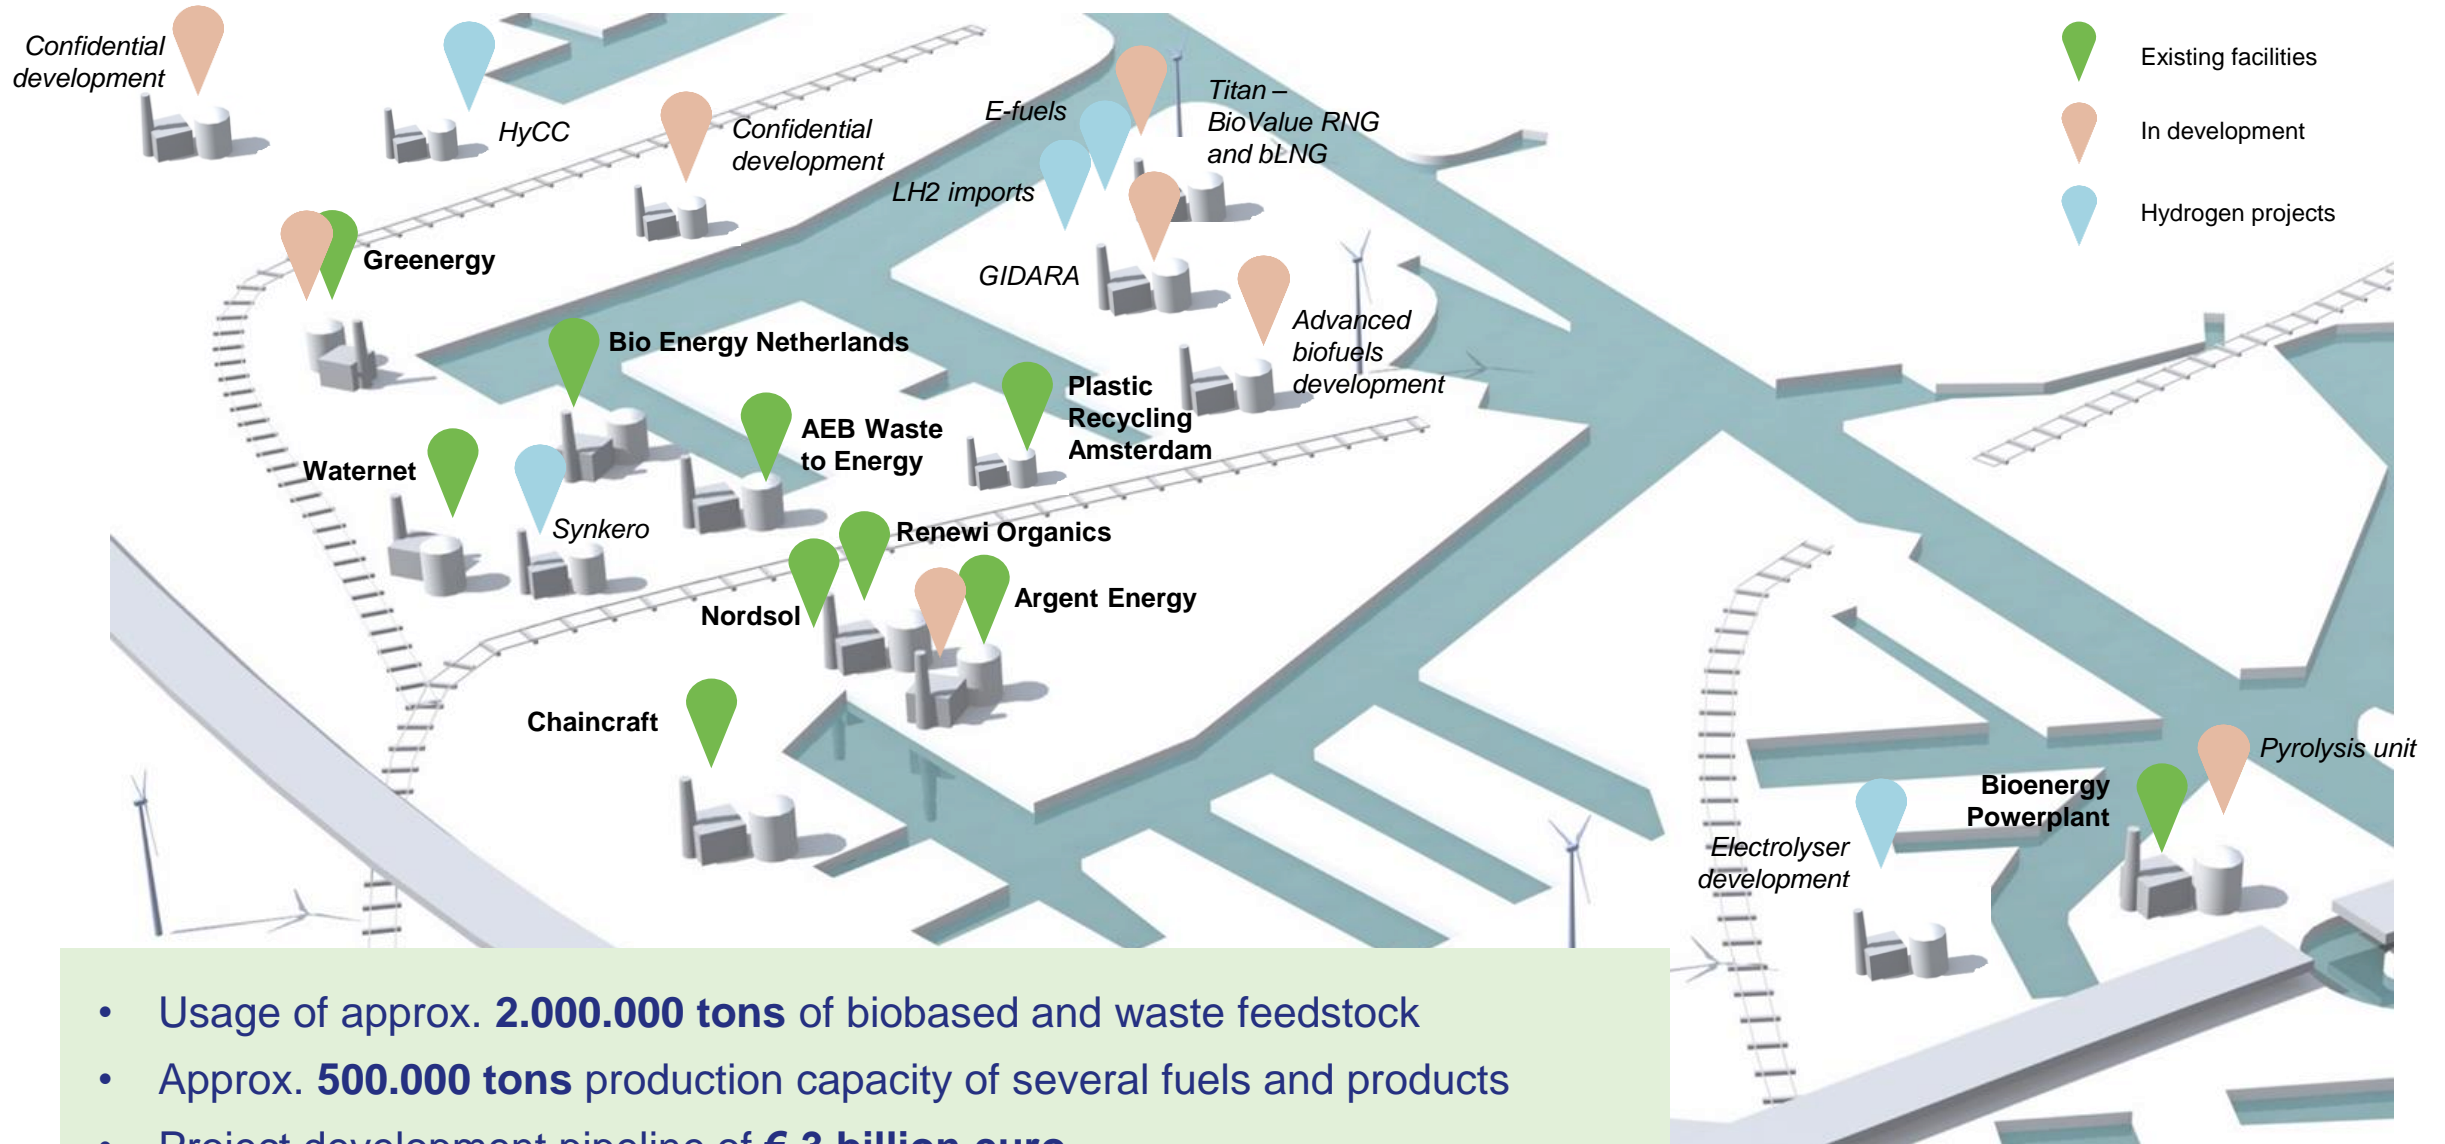

Attract production, convert storage

Our role

- ✓ **We offer dedicated space and attract investments**
- ✓ **We invest in infrastructure**
- ✓ **We bring parties together and create new value chains**

One of the larger sustainable industrial port clusters

- Usage of approx. **2.000.000 tons** of biobased and waste feedstock
- Approx. **500.000 tons** production capacity of several fuels and products
- Project development pipeline of **€ 3 billion euro**

Continued investments in the biofuels space

Source: Greenergy

7 mln. tons

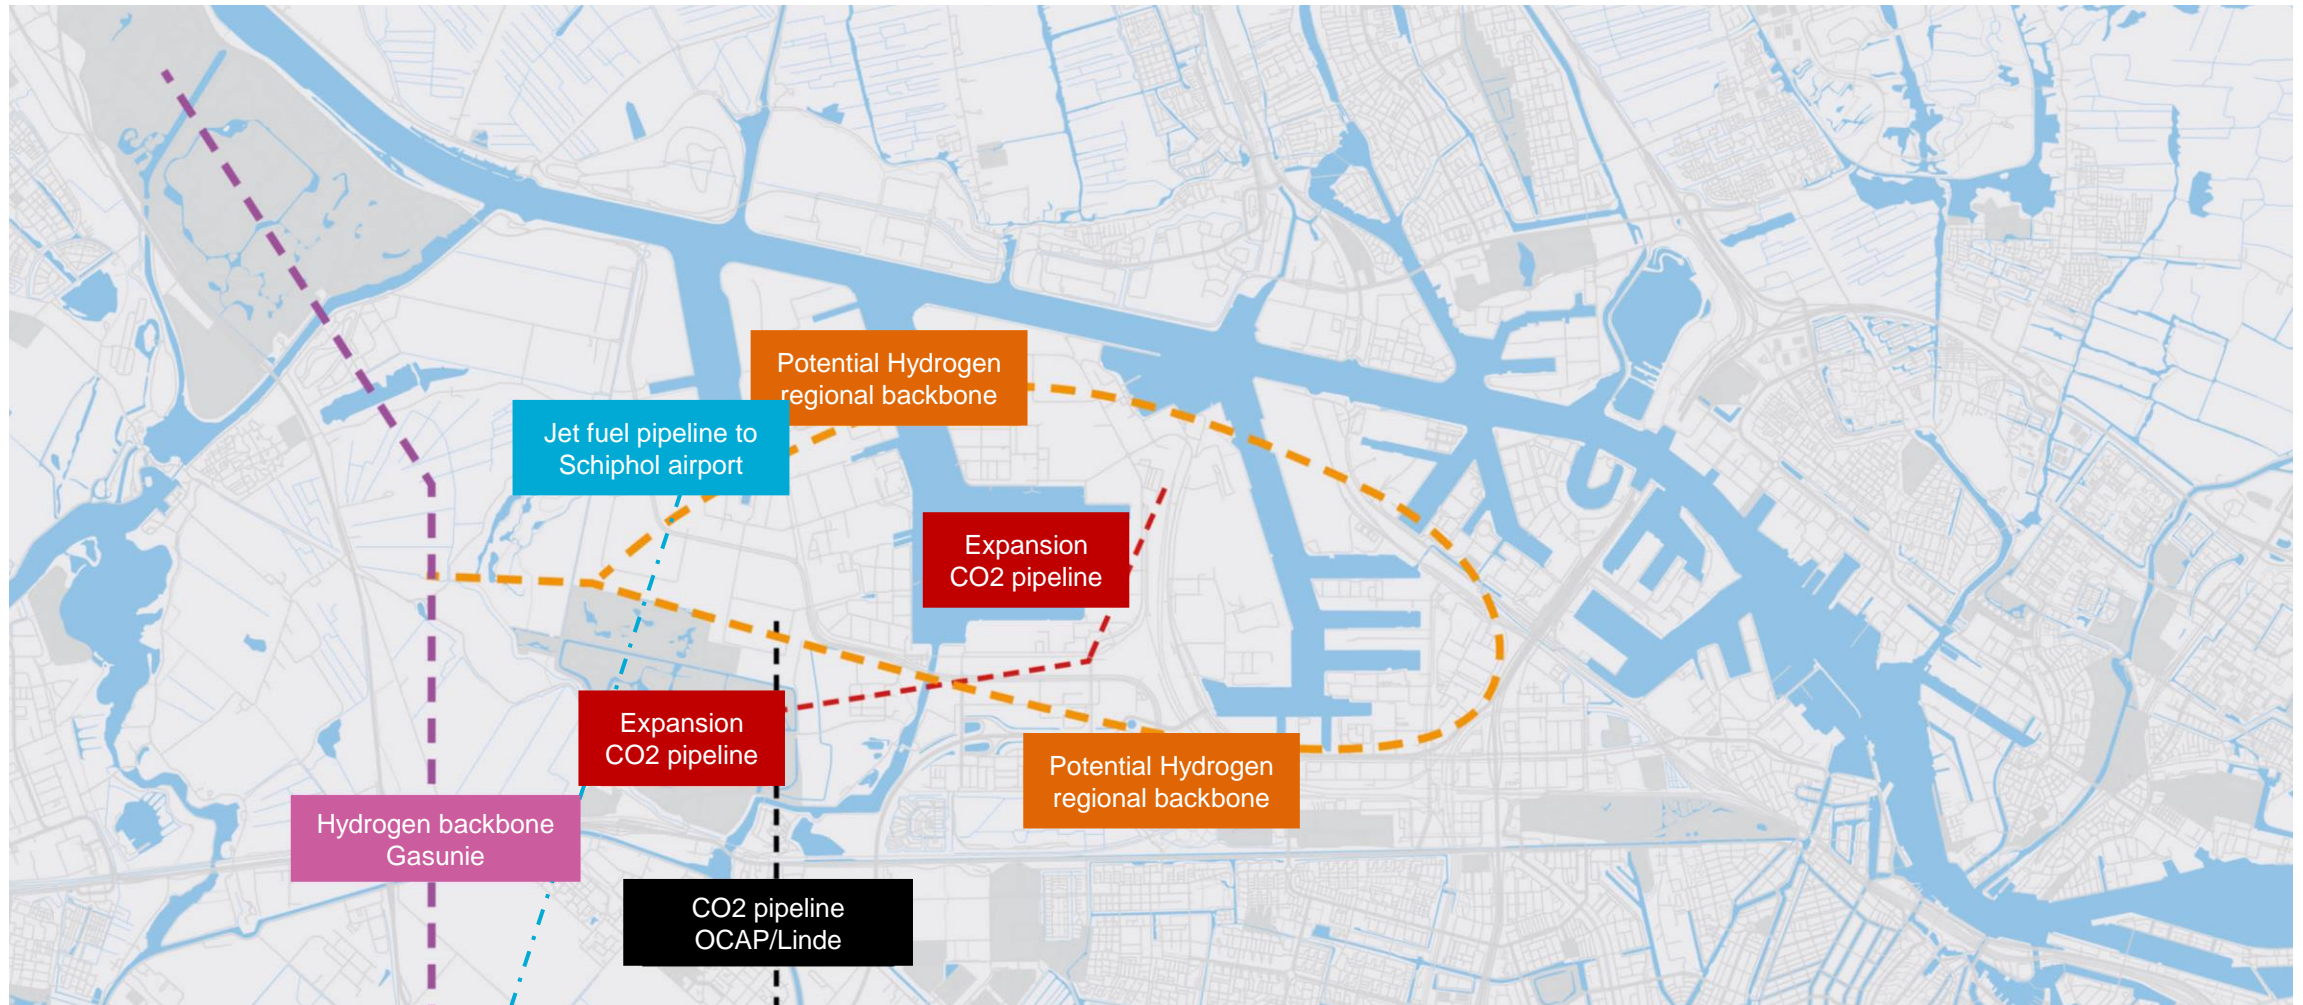

of renewable fuel throughput in 2022

8,4%

of renewable fuel storage capacity as % of total m3

Source: Argent Energy

We co-develop hydrogen and CO₂ infrastructure

We bring parties together to develop new value chains

Challenges ahead

- 1. Current investment climate in Europe**
- 2. Current investment climate in Europe**
- 3. Current investment climate in Europe**

**Site
selection**

**Biofuels
storage**

**Alternative
fuel
bunkering**

**Hydrogen
offtakers**

Be part of a better port?

Would you like to know more about the possibilities?
